

HP Pavilion G7-2235DX RAM Replacement

This guide will walk you through the steps to replace your laptop's RAM card. You may want to use this guide to increase your device's memory, or if your computer's RAM card has failed.

Written By: Dante Mugnaini

INTRODUCTION

For the RAM replacement of your laptop, you will need a screwdriver and a couple other tools. This is a relatively easy replacement and should take no more than five minutes.

TOOLS:

- [Phillips #00 Screwdriver](#) (1)
 - [Metal Spudger](#) (1)
-

Step 1 — Battery

 Before beginning, make sure the laptop is properly shut down and charger is detached.

- On the bottom of the laptop, locate the battery release slider and slide it to the left to release the battery.

Step 2

- The battery is unlocked, and can now be pulled out of the laptop.

Step 3 — RAM

- Loosen the 7.25mm screw on the bottom of the laptop holding the "L" shaped cover down.

Step 4

- Slide the cover towards you, then pull up to remove it.

Step 5

- Locate the RAM card and the two prongs holding it in place.

Step 6

- Using either your fingers or two metal tools, push outwards on the two prongs until the RAM card pops out.

Step 7

- The RAM card can now be pulled out at a slight angle.

To reassemble your device, follow these instructions in reverse order.
